

## Hendra Holiday Park Food Information

The management of allergens is something we take very seriously. However, the nature of our kitchen means there is a high risk of cross contaminations and so we cannot guarantee a product is 100% allergen free.

Our food handling procedures are created to help ensure your safety, health, and wellbeing.

We work closely with suppliers to ensure we have accurate information about our products that we use. We cannot guarantee that any foods or products used, which are manufactured outside Hendra Holiday Park are processed or produced in an allergen-free environment.

In additions, we train our teams in allergen awareness. We take all reasonable steps to minimise the risk of cross contamination, but strongly advise guests with questions to talk to us.

Some of our products may contain peanuts, nuts, or other allergens.

We are proud to be recognised for exceeding quality and excellence and the very best in service and facilities.
